

Product Specialist : Protein Crystal Screening

Salary: 26 – 33k GBP

OXFORDSHIRE

Oxford Diffraction Limited was created in 2001 to specialise in the design, manufacture, sales and support of innovative crystallography products for the proteomics and chemical analysis marketplaces. During 2006 we launched the revolutionary PX Scanner product designed to provide X-ray inspection of protein crystals *in situ* in the crystallisation plate. Our plans now dictate the need for a Product Specialist to focus on all aspects of the PX Scanner, specifically the scientific applications and worldwide marketing. For further information please see <http://www.oxford-diffraction.com>.

The role: A full time position based at our UK headquarters in Oxfordshire the role will involve all aspects of our protein screening products, including technical demonstrations, installation, customer training, applications work and the generation of all marketing literature and promotions for the PX Scanner. The role will involve extensive overseas travel to customer sites, trade shows and conferences to present scientific talks on the products and recent applications data.

The candidate: The candidate should be a scientist with a strong background in protein crystallography and / or protein crystallisation. A creative and artistic flair linked with technical writing ability and a practical knowledge of X-ray crystallography is desired. Excellent written and spoken English is essential with additional language skills seen as a benefit. The candidate should be able to demonstrate excellent computing and audio-visual presentation skills. Good communication and interpersonal skills are essential.

To apply, please email jobs@oxford-diffraction.com a current CV to include contact details of 2 referees or send to the Marketing Manager, Oxford Diffraction Limited, 68 Milton Park, Abingdon, Oxfordshire OX14 4RL, to arrive not later than 22nd January 2007.
