

Postdoctoral position in studies of DNA replication (Omaha, United States)

The postdoctoral research associate position is available at the Eppley Institute for Research in Cancer and Allied Diseases, University of Nebraska Medical Center. We use X-ray crystallography and a variety of biophysical and biochemical methods to understand the structural basis of human DNA replication. Candidates with strong background in biochemistry, and an extensive experience in cloning, expression and purification of proteins will be considered.

Interested candidates are invited to submit their application, including cover letter, detailed curriculum vitae, statement of research experience and interests as well as names and addresses of at least three references to:

Tahir H. Tahirov, Ph.D.
Professor of Structural Biology
Eppley Institute for Research in Cancer and Allied Diseases
University of Nebraska Medical Center
