

Committee for Gender Equity and Diversity (GEDC)

The GEDC advised the IUCr that the following four (of ten) recommendations from the International Standing Committee for Gender Equality in Science be implemented as priorities for the IUCr in 2023:

- Actively promote the visibility of female scientists, in particular at conferences.
- Actively promote gender balance at every level of the organization, including its leadership, committees and institutional events.
- Welcome families in scientific activities.
- Encourage the diversification of scientific awards, actively encouraging the nomination of women.

Related to the last of the four priorities, the Executive Committee tasked the GEDC with developing guidelines for IUCr prizes.
