

**Synchrotron X-ray Beamline Scientist at ChemMatCARS, Sector 15 of the Advanced Photon Source /  
Visiting Research Assistant Professor**

The University of Illinois at Chicago is seeking a Beamline Scientist in liquid interface x-ray scattering to join NSF's ChemMatCARS, a national synchrotron x-ray user research facility at Sector 15 of the Advanced Photon Source (APS) at Argonne National Laboratory (ANL). The successful candidate will work within a small group of scientists who specialize in the application of x-ray scattering and spectroscopy to liquid interfaces within a wide range of scientific problems in chemistry, biology, chemical engineering, and materials science. New opportunities for development of scientific facilities in the areas of liquid-solid interface scattering and heterogeneities of liquid interfaces will be available as the result of a major expansion of ChemMatCARS coinciding with an upgrade of the APS.
