

Meeting of the Commission for Crystal Growth and Characterization of Materials.
Varna, Bulgaria, 18-09-2018.

A few members of CCGCM had the chance to meet at the 6th European Conference on Crystal Growth, in Varna, Bulgaria, on 18-09-2018.

The meeting was attended by Thierry Duffar, Stepane Vessler, Elias Vlieg, and Andrea Zappettini. The meeting was attended also by Koichi Kakimoto, consultant of CCGCM and President of IOCG.

Because the number of participants was not large enough, we could not take any formal decision. However it was a very nice chance to discuss the emerging topics, such as the organization of the next International Schools on Crystal Growth, the search for interesting topics for the microsymposia of the next IUCR Conference, the preparation of the document on the future development of crystal growth activities.
